WHAT IS CODING?

"Coding is the art of crafting logical instructions that make computers come to life. In our interconnected world, coding fuels the creation of computer programs that power the microchips in everyday devices like microwaves, cars, phones, and countless other modern marvels."

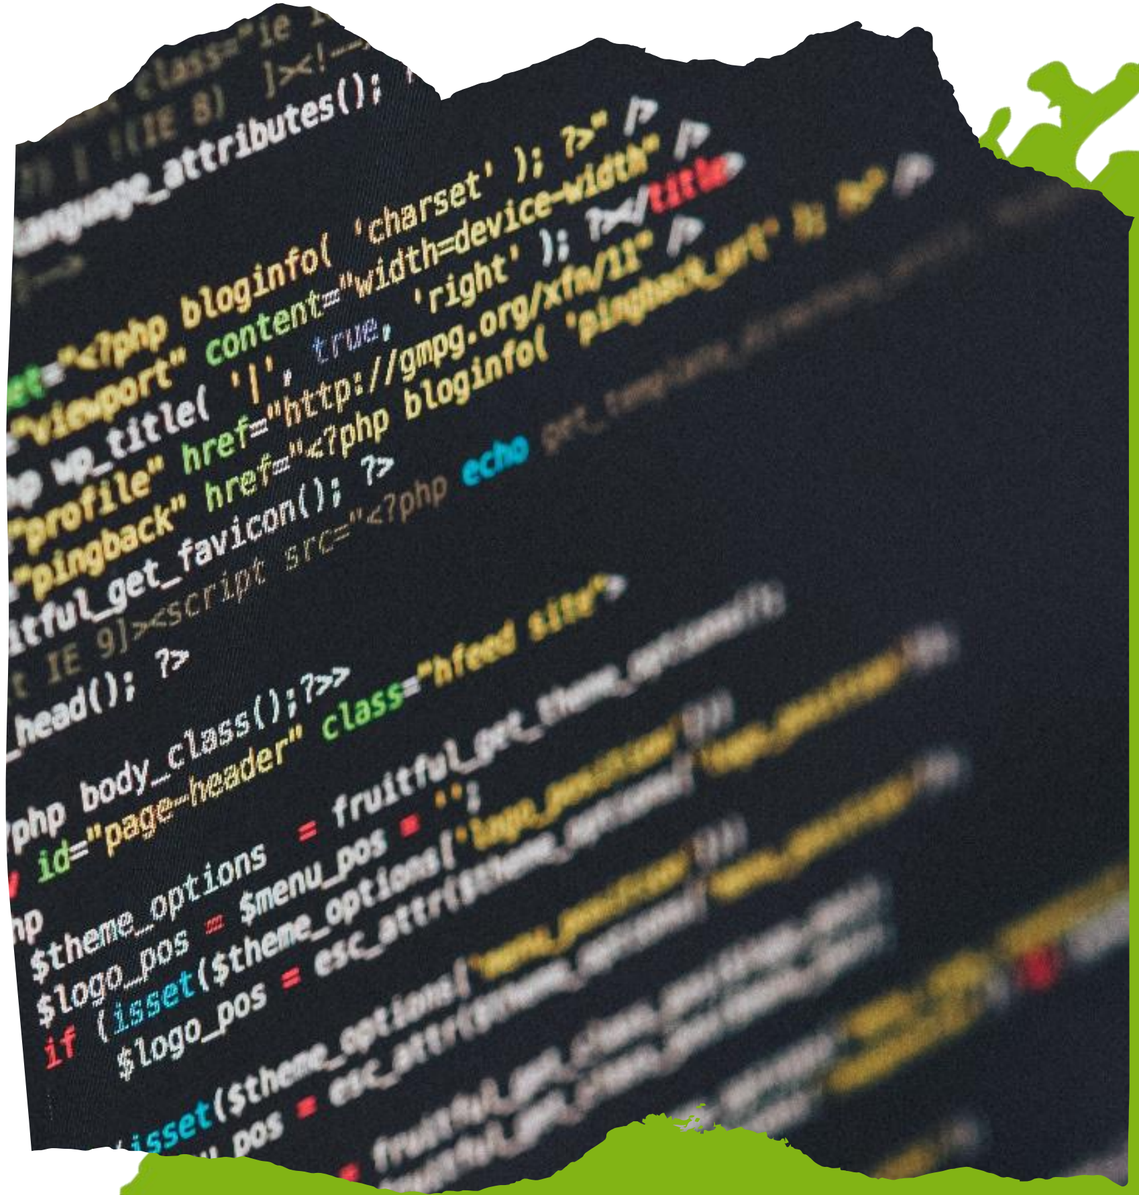
WHY PYTHON?

Python is an extremely flexible coding language that is used by many professionals, including scientists, researchers, and engineers. It is straightforward and approachable and an excellent choice for children beginning their coding journey.



TAKE THE COURSE WITH SMARTMATHZ

"Unleash your potential with smartmathz! Our dynamic online platform offers a wide range of courses, from mathematics to programming and HTML. Learn from industry experts, engage in interactive lessons, and master valuable skills. Join smartmathz today and embark on a transformative learning journey!"

WHAT WILL YOU LEARN?

In this course, you'll learn the basics of coding in Python.
You'll learn how to:

- Move a drawing robot around the screen
- Create mindblowing multicolored graphics
- Repeat lines of code (using a FOR loop)
- Keep pieces of information in your computer's memory (using variables)
- Get your computer to do math for you
- Think clearly and logically in a calm way
- Experiment and explore with your mind
- Boost your confidence

I hope you enjoy our course.
